Review:

"I want him back"

Adam was able to take our small family owned business to the next level. Not only was he able to manage our day to day operations (scheduling appointments, financing customers, and managing our books); he also built and implemented a company website, customer database, and advertising campaign. After he left I had to hire 2 employees to replace him (accountant and manager). Any company would be lucky to have an employee as knowledgeable, dedicated, and reliable as him.
