### Review:

**"The Best"**

As audit process manager my job is to help auditors reach their annual goal of closed audits (20-25). I help them reach their goals by formulating audit procedures, answering technical questions, and reviewing completed files. Most of my auditors need my help in one of these areas on a daily basis. Adam is the exception. He never needs my help and he averages 30 audits per year (highest in our office). He works independently, formulates his own audit procedures, and he rarely has technical questions. In fact, I (and other auditors) frequently consult Adam on technical questions. Adam is one of the best auditors I have ever had.
